

## ACT Systems Video Security

Video Surveillance systems are now fundamental in today's society for security in businesses, homes, schools and many other locations.

ACT Systems Video Security is a cost effective, feature rich and highly scalable, end-to-end hardware and software platform.

It offers users a scalable IP based surveillance system with remote accessibility, allowing you to view your cameras from anywhere in the world with superior image quality. It comes with intuitive software making viewing recordings and exporting video a breeze.

### Feature-Packed Surveillance System

- Expandable up to 50 1080p HD Surveillance cameras per site providing high-quality, low latency video.
- Indoor and outdoor camera capability
- View live feeds in a single or customisable multi camera format
- Quickly assess important camera activity with the easy to use interface offering advanced features such as customizable event recordings
- A variety of options and settings to customise image quality. For example, brightness, contrast, zoom, colour enhancement etc.
- Zone security allowing you to define zones to detect motion in important areas and infrared night vision.
- The software is accessible from a web browser and there is also a free app available for Android/iOS smart devices allowing viewing of live feeds and recordings wherever you are.

### Contact Us

We can offer you a range of storage solutions based on your specific camera requirements, length of recording history etc.
